

MARQUETTE TOWNSHIP RESIDENTS
What I've Heard . . .

Recent comments and public statements lead me to believe that Township residents are being misinformed regarding the Township water system. All information regarding the Township water system is available to the residents either from Township staff or published on our web site at www.marquettetownship.org. I've heard, and now respond to the following:

- “I'll be forced to connect to the Township water system”
Residents are not required to connect to the Township water system, residents have the choice to connect.
- “The Township wells have gone dry”
This is absolutely not true; the Township wells have never gone dry since being put into service in December of 2006.

There is much misinformation circulating, I ask you to take the initiative to get the answers to your questions yourself and not rely on the representations of others.

Ray J. Adamini, Township Supervisor
